COPYRIGHT

Attention is drawn to the fact that copyright of this **thesis/dissertation** rests with the author and copyright of any previously published materials included may rest with third parties. A copy of this thesis has been supplied on condition that anyone who consults it understands that they must not copy it or use material from it except as licensed, permitted by law or with the consent of the author or other copyright owners.

Acknowledgement

In this section, the student may provide acknowledgement to those who provided support and encouragement to complete the thesis.

Any funding provided by a local or an international agency/institution must be stated clearly in the “Acknowledgements” page.

Declaration

I hereby declare that this **thesis/dissertation** is my own original intellectual work and has been conducted in accordance with the principles of academic integrity and ethical research practices. The conceptual framework, critical analyses, and syntheses of knowledge are all my own contributions. This work has not been submitted for a degree at any other university or institution. I also confirm that all sources have been properly acknowledged and cited in the references.

Any use of artificial intelligence (AI) tools was strictly limited to technical assistance and did not replace the author's independent intellectual contribution, analysis, or academic judgment.

Abstract

The abstract page is required and is a condensed summary of the thesis, not to exceed 250:300 words (one page).

The thesis abstract is a short summary of the entire thesis covering the complete research work and concisely reports the problem, objectives, and outcomes of the research.

The abstract normally consists of four parts: the scope and **statement of the problem**; the **procedure and research methods used** to investigate the problem; the **results** of the investigation; and the **conclusions**.

The abstract should reflect the research process, from the initial stage of asking the original questions to the final stage of answering the questions.

It should cover the following key points (at a minimum):

1. The research **questions and objectives** – what key question(s) did the research aim to answer? – why are they important?
2. The **methodology** – how did you go about investigating the topic, gathering, and analyzing the data for finding answers to the research question(s)?
3. The **findings** – following the research, what was discovered or found out?
4. The **conclusions** – based on the findings, what answers were found? - what conclusions have been drawn? Highlight the most important ones.

The Abstract is to be written after the researcher finishes the full research report.

Keywords

The keywords are required. The keywords are to be placed directly under the abstract

List of Publications out of This Thesis / Dissertation

1. Smith, J. A. (2022). *Research methods in social sciences*. Springer.

Chapter 1: Introduction

1.1 Section Title

Paper Size:

The thesis must be printed on A4-sized paper. The main orientation should be portrait; however, landscape orientation may be used for wide tables or figures while maintaining the required margins.

Margins:

Margins should not be less than 1.0 inches at the top, bottom, and right side, and 1.5 inches on the left side (binding margin).

When printing on both sides, the inner margin should be slightly increased.

Font and Size:

The chapter titles should be in size 18pt and bold, also, titles should be formatted in a consistent heading style so that they appear on the Table of Contents.

Main headings (Level 1) should be 16 pt and bold, and sub-headings (Level 2 & 3) should be 14 pt and 12pt respectively and bold.

Times New roman font must be used for the main text in size 12 pt. The font and size of the text should be uniform throughout the thesis. Decorative fonts are not permitted.

For Arabic text, the font should be “Calibri” and font size must be 12pt. **Example:**

مثال لكتابة نص باللغة العربية

Line Spacing:

Single line spacing is required for the main text, long quotations, footnotes, and tables.

Paragraph Alignment:

All text must be fully justified, with a 0.5 cm first-line indentation where needed, and one blank line before main headings.

Page Numbering:

Preliminary sections are numbered using lowercase Roman numerals (i, ii, iii), while the main body uses Arabic numerals (1, 2, 3).

Page numbers should be placed within the margin area.

Footnotes:

Footnotes are used only for clarification and must not replace the final reference list.

Additional Notes:

Mathematical equations must be placed away from margins and separated from the surrounding text.

If an equation must be broken due to line width/lack of space, the break should occur before or after symbols such as equal (=), plus (+), minus (−), multiplication (×), or division (÷). Fractions should be written in a single line where possible using the slash symbol (/).

A clear hierarchical structure for headings must be followed (Chapter → Section → Subsection → Paragraph), with consistent formatting throughout the document.

To facilitate generating the table of content, there are **three** levels of headings in this template, which allows for automatic numbering:

1.2 Heading Title 1

Example

1.2.1 Heading Title 2

Example

1.2.1.1 Heading Title 3

Example

1.3 Section Title

A thesis/dissertation consists of three main parts: **preliminary pages, the main body of the thesis, and the concluding material**. These components must follow the following order to ensure clarity of structure and ease of navigation.

1.3.1 Preliminary Pages

Cover Page: Includes the thesis title, student's name, and academic degree.

Title Page: A detailed version of the cover page with additional information such as supervisors' names and the submission date (month/year).

Approval/Endorsement Page: Confirms the approval of the department or academic committee to accept the thesis.

Dedication: An optional short paragraph where the student dedicates the work.

Acknowledgements: A paragraph in which the student expresses appreciation to those who provided support.

Abstract in English: Provides a brief overview of the thesis topic, objectives, and key findings.

Abstract in Arabic: A parallel abstract in Arabic with the same key information.

Table of Contents: Lists chapters and subheadings with page numbers.

List of Tables: Includes numbers and titles of all tables in the thesis.

List of Figures: Includes numbers and titles of all figures, images, and illustrations.

List of Abbreviations: Contains all used abbreviations and acronyms with their meanings.

1.3.2 Main Body of the Thesis

Introduction: Outlines the thesis topic, background, significance, objectives, and the scope of the research.

Chapters: Each chapter represents a major component of the study and presents information in a structured manner.

Results and Discussion: Presents the researcher's findings, followed by analysis and comparisons with previous studies.

Conclusion: Summarizes the main findings, recommendations, and suggestions for future research.

1.3.3 Concluding Sections

Appendices: Include supporting material such as questionnaires, large tables, or documents.

References: Lists all sources cited in the thesis, following the approved citation style.

Chapter 2: Chapter Title

2.1 Section Title

Figures

Figures include charts, images, maps, diagrams and illustrative graphics.

Numbering of Figures:

Each figure's title should have **two parts**: the **first part** indicates the number of the chapter, and the **second part** is a serial number. The numbers should not be placed between parentheses.

Example: Figure 2-1 indicates Figure Number 1 in Chapter 2.

Figure Title:

The title is placed below the figure and must clearly indicate what the figure represents. Figure titles must be centered in the middle of tables and should be closer to the subject with font 11 but not bold (*could be italic*)

Figure Source:

If the figure is taken or adapted from another source, the reference is placed directly below the title.

Image/Figure Quality:

Figures and images should be of high resolution and retain clarity when printed or enlarged.

Referencing Figures within the Text:

Figures must be referred to in the body text as follows:

(See Figure 4-1)

Below is an example of how a figure is included:

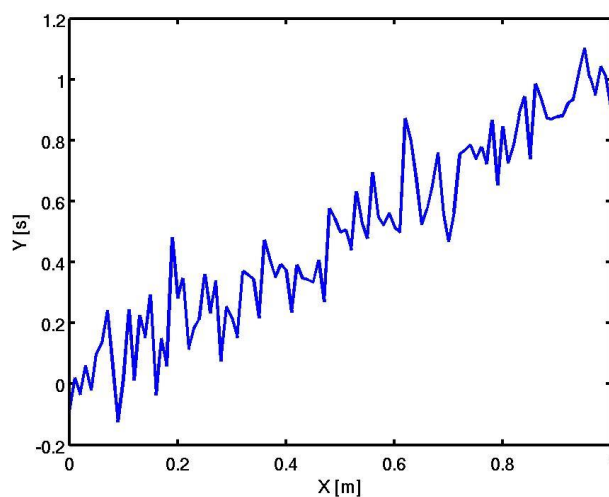

Figure 2- 1: Figure title

2.2 Section Title

Numbering of Tables:

Tables must be numbered sequentially within each chapter.

Each table title should have **two parts**: the **first part** indicates the number of the chapter, and the **second part** is a serial number. The numbers should not be placed between parentheses.

Examples: Table 2-3: indicates Table Numbers 3 in Chapter 2

Table Title:

The title is placed above the table. It should be concise, clear, and accurately describe the table's content.

Titles must be centered in the middle of tables and should be closer to the subject with font 11 but not bold (*could be italic*)

Table Source:

If the table is taken or adapted from another source, the reference must be written below the table.

Placement within the Text:

A table should be placed immediately after/as close to the first point of reference in the main text and should not cause a blank page.

Font Size within Tables:

A smaller font size than the main text may be used, when necessary (e.g., 10 instead of 12), provided it remains clear and readable.

Table Formatting:

Rows and columns must be clearly organized, and the formatting of table titles should be consistent across all tables in the thesis.

Large tables can be divided across multiple pages if necessary

Referencing Figures within the Text:

Tables must be referred to in the body text as follows:

(See Table 4-1)

Below is an example of how a table is included:

Table 2-1: Table title

Parameter	A	B
XYZ1	ABC1	ABC4
XYZ2	ABC2	ABC5
XYZ3	ABC3	ABC5

Appendix A: Appendix Title

Purpose of Appendices:

The appendix provides supplementary material that supports the research but is not essential to include in the main text (only supporting material).

Examples of Materials Included in Appendices:

- Questionnaires and survey forms
- Original images of documents
- Raw data
- Large or detailed tables
- Interview transcripts
- Measurement or research tools
- Computer codes

Numbering of Appendices:

Appendices are labeled alphabetically. Example:

Appendix A, Appendix B, Appendix C, ...

Appendix Title:

Each appendix must have a clear title indicating its content. Example:

Appendix (A): Sample of the Questionnaire Used in the Study

Referencing Appendices within the Text:

When referring to information located in an appendix, write:

(See Appendix A)

Notes

1. In general, appendices should be kept to a minimum (only supporting material).
2. If they are so important that the reader cannot understand without them, they should be in the main text (essential to know).
3. “Interesting to know” type of information should be in the appendices.
4. May include a blank copy of the questionnaire, questions during interviews, observation issues, as well as their schedule.

References (APA)

All sources and references used in the thesis must be acknowledged, whether they are books, articles, websites, reports, academic theses, or interviews. No text, idea, image, or table may be used without citing its source.

Every reference cited in the text must appear in the reference list, and vice versa.

1. APA Style

This style is mainly used for social sciences, psychology, education, business, economics, health sciences, and some interdisciplinary research areas.

Some of the key characteristics of this style:

- Author-date citation system
- Emphasis on publication year
- Clear structure and readability
- Widely accepted for applied research

Examples for in-text citation:

Single Author:

(Author, 2020)

Two Authors:

(Author & Co-author, 2021)

Three or More Authors:

(Author et al., 2022)

Examples for “Reference List”:

Book:

Last name, Initial. (Year). Title of the book. Publisher.

Journal Article:

Last name, Initial. (Year). Title of the article. Journal Name, Volume (Issue), page range.

Website:

Author. (Year). Title of the webpage. Website Name. URL

2. IEEE Style

This style is mainly used for engineering, computer science, information technology, electronics, and telecommunications research areas.

Some of the key characteristics of this style:

- Numeric citation system
- References appear in order of citation
- Concise formatting suitable for technical documents

Example for in-text citation:

“...as demonstrated in recent studies [1].”

Examples for “Reference List”

Book:

[1] (Last name, Initial(s))., *Title of the Book*, edition ed. City, State/Country: Publisher, Year.

Website:

[1] (Organization or Last name, Initial(s))., “*Title of the webpage*,” *Website Name*. Available: <https://www.website.com> (accessed Month Day, Year).

الملخص

صفحة الملخص باللغة العربية مطلوبة و تكون خلاصة موجزة للرسالة، لا يتجاوز 250-300 كلمة (صفحة واحدة). تُستخدم الأرقام الرومانية الصغيرة لترقيم هذه الصفحة.

عادةً ما يشمل أربعة أجزاء: **عرض المشكلة؛ الإجراءات والطرق المستخدمة للتحقيق في المشكلة؛ نتائج البحث؛ والاستنتاجات.**

يُعدّ ملخص الرسالة ملخصًا موجزًا للعمل البحثي الكامل ويعرض بإيجاز المشكلة، والأهداف، ونتائج البحث. وهو أهم جزء في الرسالة، وقد يكون الجزء الوحيد الذي سيقراه البعض.

يجب أن يعكس الملخص عملية البحث، بدءًا من المرحلة الأولى لطرح الأسئلة الأصلية وصولًا إلى المرحلة النهائية للإجابة عنها.

يجب أن يتناول الملخص النقاط الأساسية التالية (على الأقل):

1. **أسئلة البحث والأهداف** – ما السؤال أو الأسئلة الرئيسية التي سعى البحث للإجابة عنها؟ ولماذا هي مهمة؟
2. **المنهجية** – كيف قمتَ بالتحقيق في الموضوع، وجمع البيانات، وتحليلها لإيجاد إجابات لأسئلة البحث؟
3. **النتائج** – بعد إجراء البحث، ماذا تم اكتشافه أو التوصل إليه؟
4. **الاستنتاجات** – بناءً على النتائج، ما الإجابات التي تم التوصل إليها؟ وما الاستنتاجات المستخلصة؟ أبرز النقاط الأكثر أهمية.
